HAVE YOU EVER HEARD THE FOLLOWING MYTHS ABOUT FLOOR FINISHES?

- SHINY FLOORS ARE SLIPPERY FLOORS
- FLOOR FINISHES MAKE FLOORING MATERIALS SLIPPERY
- BUFFING OR BURNISHING A FLOOR MAKES IT MORE SLIPPERY
- A "BUILD-UP OF WAX" RESULTS IN A SLIPPERY FLOOR

It is well known within the floor maintenance industry that the use of a floor finish does not make a slippery floor. Floor contaminants can make the floor slippery.

The accumulation of water, oils and other lubricants can cause floor surfaces to become slippery whether or not they are coated with a floor finish.

The time to think about accident prevention is before they occur.
