

DIRECTIONS FOR USE — Each drain should be cleaned nightly.

1. Attach the foaming tip to the ElimineX® RTD® product bottle and connect product bottle to water hose.

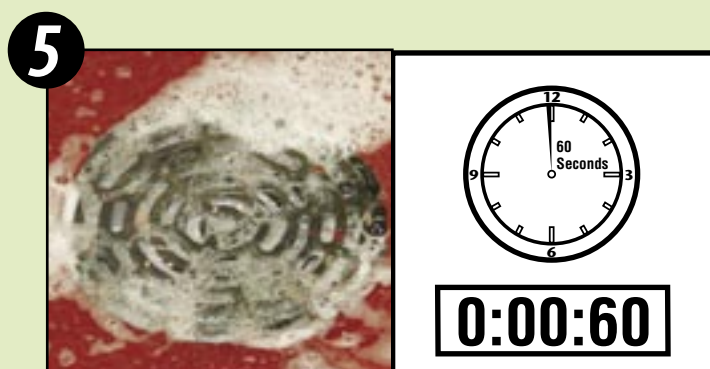

2. Turn on water supply using #2 knob (rinse) on 606 unit for rinse.

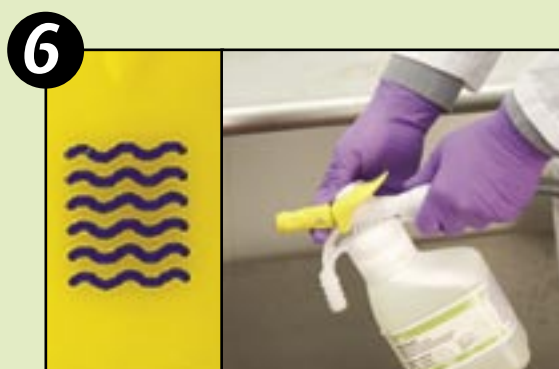

3. Turn the Selector Knob of the RTD® product bottle to the high spray position.

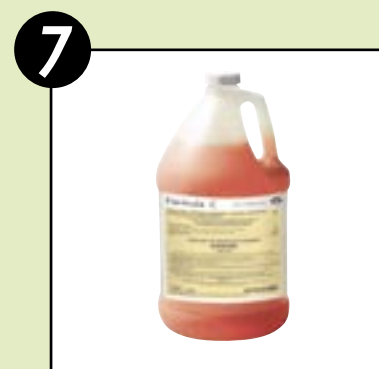

4. Spray drain for 2 to 10 seconds, thoroughly coating all drain surfaces.

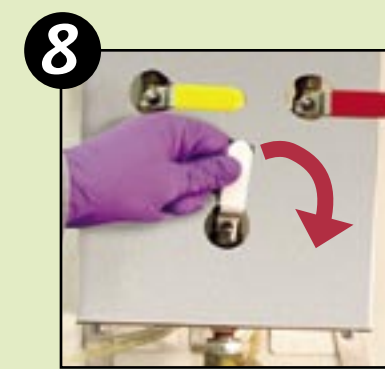

5. Allow product to stand for 30 to 60 seconds.

6. Turn the Selector Knob of the RTD® product bottle to the rinse water position, and rinse the drain thoroughly. Disconnect the ElimineX RTD® bottle.

7. If desired, apply a sanitizer to the drain. Thoroughly coat drain surfaces with the sanitizer solution.

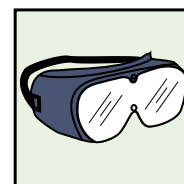

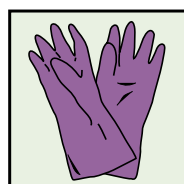

8. Turn off the water supply. Never leave the RTD® product bottle connected to water pressure when not in use. Put away product bottles and replace the water hose.

9. If a hose is not available, dispense ElimineX® into bucket or pail and pour down drain. Product should dwell for 30-60 seconds and be rinsed with clean water.
