

# Restrooms

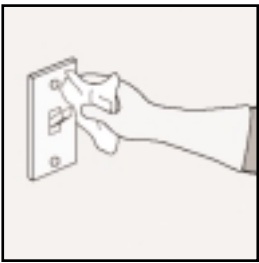

## Restroom Cleaning Requirements

1. Always use appropriate personal protective equipment.

2. Ensure that cleaning and disinfecting solutions are prepared and used according to label directions.

3. Frequently clean surfaces that hands touch to eliminate the spread of germs, (e.g. door knobs, light switches, handles, etc.)

4. Frequently address moisture problems — especially on floors.

5. Keep all surfaces as dry as possible to prevent build-up of bacteria, mold and mildew.
