- Total Wood Care Program
- Detailed Stone Care Services
- Linoleum, Rubber and Alternative Substrate Programs

ABM Floor Care Services Conquer your Floor Challenges Inside & Out

SURFACE COATING

PENETRATING SEALER

ABM Floor Care services help keep your floor looking cleaner, longer.

Whether your floor is marble, granite, terrazzo, travertine, ceramic, tile, concrete, brick, quarry tile, slate, limestone, porcelain or just about any other stone or ceramic surface:

- Dirt and grime is held at the surface so it's easier to remove-resulting in less maintenance dollars.
- Spills and stains can be contained and controlled for a more consistent appearance.
- Cleaning is easier because soils and spills are held at the surface.

ABM floor service solutions will create a lasting impression while fully protecting your floor.

Carpet Cleaning Made Safe and Easy

Dirt and soil are easily visible and wiped off on hard surfaces, but on carpets they can quickly work their way deep into the fibers. Dirt and soil combined with abrasive action such as foot traffic will cause your carpets to deteriorate and need replacing prematurely. Regular carpet cleaning and shampooing will help preserve the quality and beauty of your carpet for years to come.

Our deep cleaning system uses self-neutralizing chemicals that flush the dirt and pollutants from the fibers, leaving your carpets clean and fresh again.

We offer only the best cleaning methods and use the safest, most effective products. Most carpet manufacturer's recommend that carpets be professionally cleaned every 12/24 months. High traffic areas often need cleaning much more frequently.

Maintaining your carpet is a planned ongoing process of soil removal designed to retain carpet appearance at a good level every day.

Hard Surface Floor Care

ABM's solutions also cover hard wood floors, marble, tile and other stone. Regular maintenance of these costly flooring materials keeps them looking good for years to come (we're experts in removing black heel marks from your hard-traveled vinyl floors!) Our services, equipment and techniques make them shine while reducing the chance someone will slip and fall.

We use only the best cleaning solutions and equipment which are right for the location. We use the best floor care products in the market, which are carefully lab tested to enhance protection, slip resistance, and appearance.

ABM can streamline your floor care needs by using our excellent service methods.

ABM's ***Solutions*** for Floor Care can provide new opportunities for both interior and exterior surfaces
