

Floor Care

Floor Stripping Requirements

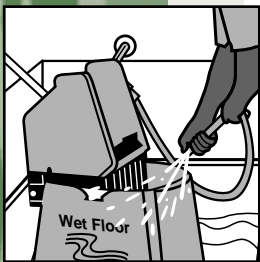

- 1. Notify occupants beforehand if a strip-out is required.
- 2. Ventilate area and building during and after stripping.
- 3. It is preferable to conduct stripping procedures on weekends or some other time of extended inactivity.

Buffing & Burnishing Requirements

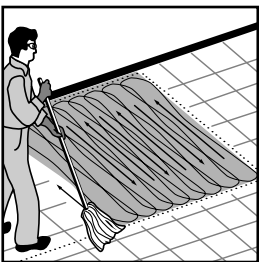

- 1. Make sure that adequate floor finish exists.
- 2. Apply product in a stream or coarse spray only.
- 3. Make sure that the pad matches the rotary or burnisher machine speed and floor finish.

Floor Finish/Sealer Application Requirements

- 1. Apply finishes or sealers with a clean damp rayon mop.
- 2. Use clean buckets with clean wheels.
- 3. Line bucket with fitted trash liner.

- 4. Apply even coats without rubbing or scrubbing.
- 5. Don't force dry finish or sealer with a fan. Only use indirectly to increase air flow.
