**Always use the
correct protective
equipment when
working with
sanitation supplies.**

1. Check concentrate for adequate supply - if low replace with new one gallon container.
2. Turn on water supply to dispensing equipment.
3. Select correct spray bottle to be (re)filled.
4. Place discharge tube for correct product in top of spray bottle.
5. Press button on dispenser for correct product. When bottle is full, release button.
6. Repeat steps 3 through 5 for each spray bottle to be filled.
7. Turn off water supply to dispensing unit.
8. Always save empty spray bottles - cost is 75¢ each.
